

Saving Hearts and Reducing Healthcare Disparities in Georgia – It Takes a Village

Alliant Quality, the QIN-QIO (Quality Innovation Network-Quality Improvement Organization) for Georgia and North Carolina, is currently seeking all healthcare practitioners, medical practices, patients and families, community organizations, and Million Hearts® stakeholders both state and national, to join efforts to improve and measure progress on the **ABCS** of cardiovascular health:

- A**spirin as appropriate
- B**lood pressure control
- C**holesterol management
- S**moking screening and cessation counseling

Heart attacks and strokes are the leading cause in death in our nation! It takes a village of communities to identify the barriers, share best practices, and make a nationwide impact. So, we need your help to do your part in Georgia!

CMS and The Centers for Disease Control and Prevention (CDC) created the Million Hearts® initiative to bring together communities, health systems, non-profit organizations, federal agencies, and private-sector partners from across the country to prevent a million heart attacks and strokes before 2017.

To enroll or to learn more about this free program, please fill out the fields below and click the submit button, or save and return by email or fax to Angela Flanigan at aflanigan@gafp.org Fax: 404-321-7450
